Coding Solutions...Easing Lives!

About Us

WE EXCEL Softwares Pvt. Ltd is a trailblazer in Off the Shelf (OTS) Customized Application Development (CAD) including Web Application Development (WAD) since 2003. We are innovative in delivering myriad Business and management Solutions as per industry requirements with an out of the box expertise. Understanding the process needs of a broad base of clients in the public as well as private sector, we aim at a high level of customer satisfaction and responsiveness.

As a Microsoft Certified Partner, we have proven our forte in Microsoft technologies and is completely focused on being the forerunner as per the industry standards. As a partner of the Oracle Partner Network, it has again established its presence in the area of delivery and services. We strive to achieve a consolidated, sustained and independent growth that ensures long term business growth.

Quality Policy:

At WE EXCEL, our mission is to provide high quality scalable end to end business solutions and services leveraging and sustaining the growth of our clients. We work in an environment of mutual trust, honesty and accountability. We believe in excellent customer service and integrity. At the same time we are committed towards the overall development and growth of our employees.

We place a high regard for quality in services, relationships, products and work environment. All these cannot be achieved without proper implementation of processes and procedures relating to every aspect of the company. We strive for continual improvement in processes and products and the implementation of ISO 9001 : 2008 is a step towards the same. This sets and provides a framework for establishing and reviewing Quality objectives.

Institute Management Software

Enterprise Institute Management Application is an asset to institutes that require extensive management for process improvements to reach their planned goals and objectives. The Application has been developed after an extensive and in-depth research of various departmental management plans and activities across various educational institutes. It's uncomplicated and user friendly interface assures that the users can manage their work activity by a few keystrokes and mouse clicks. The application also embeds the extensibility to touch screen interface, smart card capability and interactive biometrics technology features. In addition the application integrates the mobile accessibility and SMS feature.

The application has been designed to work on a client / server architecture with regulated and role based levels of accessibility within the academia and the administration and authentication procedures to avoid unauthorized access or manipulation of data.

The Key Features Include:

- Online Reporting for a comprehensive and critical overview for efficient and well informed decisions on management and administration
- Extremely user - friendly interface for easy navigation & information storing, processing and sharing.
- Integrated structure to avoid data redundancy
- Modular approach for maximum flexibility & robustness
- Customized application incorporating client needs
- Centralized Data Storage for easy maintenance & administration
- Easy Extensibility for Smart cards/ Bio-metrics/ Bar Codes
- One stop for all management procedures
- Embedded Chatting Tool / Notice Board / Email box for effective & speedy communication
- Anytime, Anywhere Data Availability
- Advanced security and authorization to the users with different accessibility levels
- User tracking to detect manipulation or theft and to fix accountability for errors

ADMINISTRATION MANAGEMENT

The IMS is a completely integrated browser based system for total work flow automation for the management and administrative processes of institutes. It seamlessly integrates the various manual and semi automated processes within the institute, thus providing leverage to the management and the administration through error free reporting and database management. It streamlines operations and work processes and also consolidates information for increased operational effectiveness and decreased overheads.

STUDENT MASTER INFORMATION

Student Master module maintains an exhaustive and all inclusive database of students with Student's personal and admission details, Batch Wise/ Class wise enrollments, Bio Data with enrollment, Individual Assessment, Graphical Reports, Adm. No/Roll No Wise Students Detail, Personal Detail, Certificates, Previous Education Details, Photo – Upload / Capture, Official Detail, Family Detail, Contact Details & Many Customized Reports based on Existing Data Fields.

ATTENDANCE

The software maintains separate attendance registers for different categories in the institute (Students, Regular teachers, Administrative staff etc) and compiles various reports as required such as Daily Attendance Report, Student wise report, Class / Section wise report, integrated with Academics & Payroll. Contactless smart cards/ Biometric are used to operate the attendance system.

EXAMINATION AND EVALUATION

Marks entry by the user automatically initiates the process of result preparation for individual students, comparative class reports and a comprehensive school result. Printable reports generated through this module are final progress card of each student with his/her picture affixed thereon, Class/Course result, Institute result, Subject wise results of a class/ course for individual exams as well as entire session, List of subject wise as well as aggregate toppers in a class, List of students failing in particular percentile range in a class/ course. You will also get Branch/Semester Wise External or Internal Result, Internal Award List, Reappear/Failure Result, Individual Student Result, Branch/Semester Wise Toppers, Subject Wise Toppers and many more customized Reports.

ASSIGNMENT MODULE

Assignments can be uploaded by the faculty for the students to download their particular tasks . Further, the students can upload the completed projects for the teachers to evaluate .Students can get their assignments/projects/homework online. They can also be a part of discussion forum on projects/careers/technology etc.

FEE MANAGEMENT

Various processes of the accounts department like raising of invoices, records of fees received, Advance Fee Receipt, Daily Fee Collection, List of Students defaulting in payment of fees by due date, Head Wise Collection, Head Wise Pending etc. are automated through this functionality of the IMS. Manual errors are minimized and operational efficiency is increased in the process. Moreover computerized fee receipts reduce a lot of hassles of stationary and record keeping. Comprehensive reports can be generated on due Fee in Advance, Fee Collection, Misc Fee Collection, Daily/Date wise Fee Collection, list of students defaulting in payment of fee by due date, Daily Fee Head Summary, Defaulter List.

TRAINING & PLACEMENT MODULE

The application effectively handles details and schedules of Prospective Visiting Employers, aspiring candidates, on and off campus placements and Industrial trainings.

HR MANAGEMENT

A comprehensive, centralized and readily accessible database of all the employees with a full record of their qualifications and achievements linked to Payroll is the key feature. The record can be used for current and future reference. Form 16 of teachers' dues is also ready. Access to the accounts of the teachers becomes handy with a full record of the teachers Pay, Leave records, incentives, increments TA/DA, Employee's Master Report, ACR, Monthly & yearly Salary report, Pay slip, EPF & TDS, Form 12, Form 3A, Form 6 A any other credits or dues & many more customized Reports.

ONLINE COMMUNICATION

Restricted access, Secure and Unique Login ID/Password are provided to all the students/Parents at the time of admission for communication with the faculty/administration. Parents can correspond with the subject/class teacher directly for any counseling/ improvements or to view their ward's progress throughout the academic session/s. With the help of this module, management can check student admission record, fee receipts, expenditure details etc. online from anywhere around the world. Data availability through web (Any-time anywhere) helps in efficient decision making.

FINANCE MANAGEMENT

All complex procedures related to financial reporting and fund accounting are unified and simplified in this convenient system. Fee module and payroll system is fully integrated with the accounts thereby combining departments and generating useful and informative reports. The following reports can be generated automatically from the accounts module : Daily Cash Book, Daily Journal Book, Daily Fee collection (Head Wise), Ledgers (Including employees and Fee ledgers), Trial Balance, Income and Expenditure A/c, Balance Sheet etc.

BUDGET

This software application is specially designed to manage the proposed income and expenditure and the total budget for the whole session. You can get instant access to funds availability and head wise expenditures (proposed or incurred) etc and many reports related to the same.

INVENTORY CONTROL

The module offers a complete set of inventory and supply chain management - which can be successfully integrated with the accounts. This exhaustive application manages all your stocks with Purchase Header, issue and returns.

LIBRARY MANAGEMENT

The features in this module automate and expedite a large number of operations like Issuance and Return of books, maintenance of Stock and Fine registers, Day wise Transactions and Cataloguing of any type of media in the library (books, periodicals, journals, audio and video equipments etc.)

SMS

The administration can send important correspondences as SMSs through the computer to already configured groups of students/guardians/parents.

We Excel Has Also Systemized The Reports For Notices/ Events, Disciplined Management, Internal Communication Within The Management, Alumni Records, Dispensary, Centralized Bar Code Facility, Parents Management, Master Form of Each and Every Module & many Customized Reports Based On Existing Data Fields.

Benefits

MANAGEMENT

An integrated product to automate administration tasks, accurate data handling and maintenance, controlling of day to day operations, reporting requirements and academic management in a centralized system.

The software manages the Academic and Non Academic functions of the Institution.

More efficient, cost effective and paperless database handling, guaranteed error free result at the touch of a button.

Effective online management of several institutes at the same time.

Advanced role based security and authorization synergize your efforts towards Communication, Competency, development and resourcefulness with one tool that can bring them all together.

STUDENTS

Access to assignments/academic resources, check marks/grades, attendance, maintain and submit assignments online.

TEACHERS

Can keep a track of students overall performance, attendance, provide support to students by addressing all the queries online, receive assignments online, thus optimize better results.

PARENTS

providing facilities to promote interaction among the parents of the wards and the teachers like the SMS module and the Interactive Websites.
